

1. SUMOSTA is written on the top left of the website as shown below. I want the tagline 'indulgence that cares' below the word 'sumosta'.

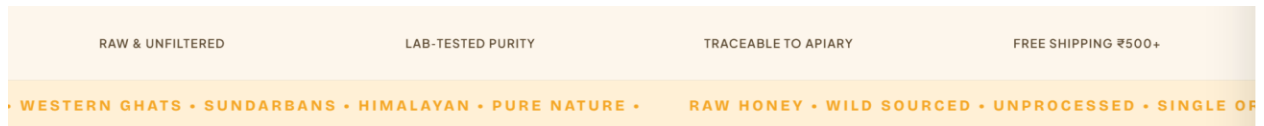

2. Refer below screenshot

I want the following in a moving direction (Refer Honeyveda website for ref)

- Free delivery on orders above ₹ 499
- 10% discount on first order
- 10% discount on Bundles/combos
- 5% discount on pre-paid orders

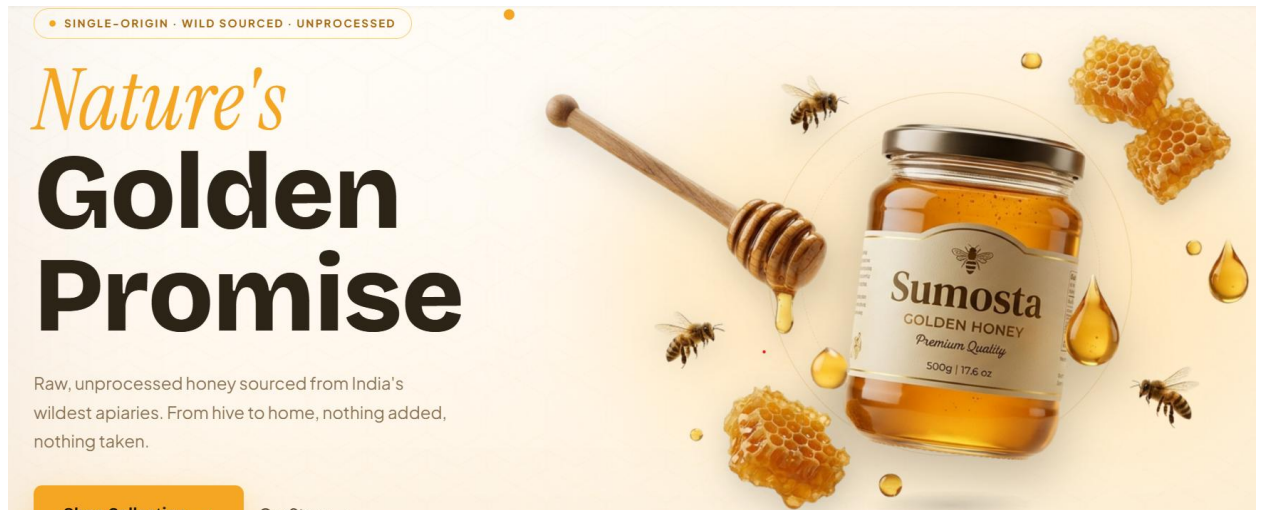

3. Refer below screenshot

I don't want 2 separate thing like above. I just want the following in a moving direction (Refer Honeyveda website for ref)

- 100% Raw & un-processed
- 100% Pure, no additives
- Un-heated, minimally filtered
- NABL Lab Tested & NPOP APEDA Organic Certified
- Ethically Sourced from Pristine Indian Reserves

4. Refer the below screenshot

I don't want the above at all.

I want the following Optimized 3 slide Hero structure

Slide 1: The Identity & Philosophy Hook (The Brand Anchor)

- **Visual Image:** A gorgeous, minimalist, high-end vector illustration of a Sumo character with BoBo – golden small honey bee, Nature & forest in background seamlessly blending into a high-resolution photograph of the 5 premium honey glass jars (with SKU names clearly visible) on a raw forest moss.
- **Main Text:** From Hive to Home, nothing added, nothing taken.
- **Call to Action (CTA) Button:** 'Shop Collection' tab
- **Imp Instruction:** Because our website layout is so elegant and clean, the illustration **must not look like a loud, colorful children's cartoon**. If the Sumo looks like a comic book character, it will cheapen the premium, NABL-tested, therapeutic feel of the honey line. Instead, execute the Sumo and the bee in a **sleek, minimalist line-art style, a subtle charcoal sketch style, or an elegant, mythical folklore aesthetic** that matches the sophisticated typography on the screen.

Slide 2: The Discovery Box (The Friction Killer)

- **Visual:** A stunning, close-up lifestyle shot of the "5 Elements Collection" secondary packaging being opened, showing the five 70g mini-jars perfectly nestled inside a premium box. It should look like a luxury gift box.
- **Main text:** Taste the Whole Forest.
- **Sub-text:** Can't decide on one? Experience all 5 of our rare wild forest honeys in one premium collection.
- **CTA Button:** Shop the 5 Elements Collection Box

Slide 3: The Functional Remedy Packs (The Solution Finder)

- **Visual:** A split-screen or dual-product layout showing **Nature's Rare Treasures –The Forest Alchemy Duo** (Rare Dammer + Canopy Dew) on one side with a dark, medical-apothecary vibe, and **The Heritage Trio** (Bloodseed + Artisanal Heritage + Organic Wild) on the other side with a rustic, indigenous forest vibe.
- **Main Text:** Monsoon-Proof your immunity.
- **Sub-copy:** Whether you need advanced cellular defense or deep daily mineral recovery, find your targeted wellness pack.
- **CTA Button:** Explore Curated Bestsellers Bundles

In all the images or any creative visualization of the honey jars that you use on any section of the website, please ensure there is consistency in the image of the honey jar body. Currently and also in the previous website, sometimes the lid is different, sometimes its black in color sometimes its golden in color. So to inform you our glass jars – 70g or 250 or 500g all are going to be with golden lid/cap of the bottle.

5. After the main 3 rotational slides, I need the following statement below it
At SUMOSTA, we believe sweetness should do more than delight. That's why we're introducing raw, unprocessed honeys from India's pristine forests — not as something you reach for only when you're unwell, but as a delicious daily indulgence that cares.

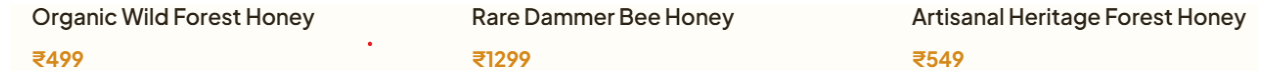

6. The Collection

Taste the terroir

I don't want the wordings 'RAW FOREST HONEY' to repeat below every product image as the name of the SKU is sufficient.

7. Refer the screenshot

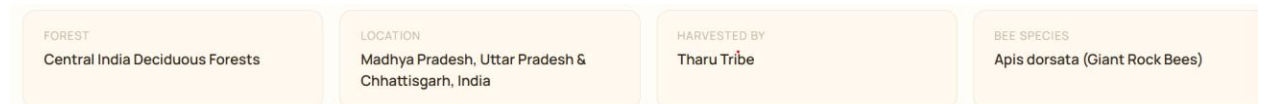

For all the SKUs below their respective product images in 'The Collection' section, I want the prices to reflect in a particular way where the MRP amount is written and then that's cancelled off and the Selling price is written besides it.

Re-sharing the MRP & Prices

Sr No	Honey Glass Jars (500g)	MRP	Selling Price
1	Organic Wild Forest Honey	699	599
2	Rare Dammer Bee Honey	1699	1399
3	Artisanal Heritage Forest Honey	799	699
4	Canopy Dew Forest Honey	799	699
5	Bloodseed Forest Honey	799	699

Sr No	Honey Glass Jars (250g)	MRP	Selling Price
1	Organic Wild Forest Honey	399	349
2	Rare Dammer Bee Honey	899	799
3	Artisanal Heritage Forest Honey	449	399
4	Canopy Dew Forest Honey	449	399
5	Bloodseed Forest Honey	449	399

8. Refer the below screenshot

In case of all the Honey SKUs, let's standardize the format/structure content as follows

Particulars	Organic Wild Forest Honey	BloodSeed Forest Honey	Rare Dammer Bee Honey
Source	Central India Deciduous Forests	Abujhmarh Forest, Chattisgarh	Nagaland Forests
Harvested by	Local Tribal Gatherers	Madia & Muria Gonds	Angami Tribe
Honey Bee Species	Apis Dorsata	Apis Dorsata	Meliponini (Stingless Dammer Bees)

Profile	Gentle Woody, Warm Floral sweetness	Smoky Flavor, Earthy Aroma	Tangy-Sour-Sweet
---------	--	----------------------------	------------------

Particulars	Artisanal Heritage Forest Honey	Canopy Dew Forest Honey
Source	Kandhamal Forest, Odisha	Saranda Forest, Jharkhand
Harvested by	Kondha Tribe	Native HO & Munda Tribes
Honey Bee Species	Apis Dorsata	Apis Dorsata
Profile	Rustic Sweet	Dark Earthy & Mineral Warmth

These details to be shown in a sequence as mentioned in the next point.

9. Also refer the below screenshot

NPOP APEDA Certified, NABL Lab tested, 100% raw, Un-processed Honey

Size

250g Glass Jar – ₹299

500g Glass Jar – ₹499

– 1 +

Add to Cart

NPOP APEDA ORGANIC

NABL LAB TESTED

ETHICALLY HARVESTED

FREE SHIPPING ₹499+

Here as well there is repetition – above also its written NABL Lab tested, NPOP APEDA Organic certified and below also the same thing is repeated. Makes no sense. So not only for this SKU but across all SKUs, please mention details in following sequence

- Name of the Honey SKU
- Its MRP & Pricing
- Details of Source, Harvested by, Bee Species & Taste Profile
- Details like 100% Raw & Unprocessed, NABL Lab tested, Ethically Sourced, No added Sugar & preservatives will be common across all SKUs except for Organic Wild Forest Honey where NPOP APEDA Organic certified will be added.
- Sizes tab, Add to cart
- Description of the product
- Instead of 'Why it works' make it 'Benefits'

- How to use
- Shipping tab – we will have to integrate shiprocket of shopdeck kind of shipping parnters where the customer can put the pin-code and check the delivery timeline like follows

 Get it by **Sunday, Aug 02, 2026** with  Shiprocket 

 Deliver to Mumbai - 400080 

Delivery
Guaranteed

Secure
Transactions

5 star rated

Easy Order
Tracking

- Remove the NABL lab certificate Photo from each product sku (refer screenshot below). Instead we will provide the image or pdf of the lab test report once we receive the same shortly.

NABL Lab Certificate

Batch SMS-TRF-015 - Tested by NABL Regional Analytical Lab, Bhubaneswar

Parameter	Result	FSSAI Limit	Status
Moisture Content	18.1%	Max 20%	Pass
HMF (Freshness Marker)	14.2 mg/kg	Max 80 mg/kg	Pass
Fructose/Glucose Ratio	118	Min 1.0	Pass
Sucrose Content	1.9%	Max 5.0%	Pass

- Also remove the 'shipping & returns' from across all product SKUs & gift/combo packs. The shipping & return policy to be disclosed on website as per previous website only at the bottom end links.

Shipping & Returns

Ships in 2-4 business days. Free shipping on orders over ₹499. 7-day returns on unopened jars.

- The 'product photo' section across all SKUs will consists of the following consistent format/structure

- **First: The Hero Shot:** High-res product jar alongside the packaging on a rustic, natural wooden texture background (Content of Front label face about the product SKU & its details clearly visible) – 250g & 500g jars separate images so when customer presses 250g tab in 'size / variant' section, 250g jar image appears and likewise for 500g – highlight the source, taste profile, 100% raw & unprocessed, No artificial sweetener, No preservatives, ethically sourced
- **Second:** Why choose SUMOSTA – a split differentiator between SUMOSTA & other commercial brands (Reference images shared in group)
- **Third:** Image displaying the benefits along with product image (Reference images shared in group)
- **Fourth:** Image displaying the use-cases (Reference images shared in group)

- **Fifth:** Image of NABL Lab test report, the NPOP APEDA organic certificate as the case may be

11. The details in 'benefits' and 'how to use' sections needs to have some icons or pointers.

Currently it looks like just too many text. Also highlight or bold the main title words like 'The ultimate golden immunity shot' and then the rest text could be normal.

12. I cannot see **The Forest Alchemy Duo** (Rare Dammer + Canopy Dew) and **The Heritage Trio** (Bloodseed + Artisanal Heritage + Organic Wild) in the 'Combos' section. The whereabouts were already shared in the document named "Raw Honey Website details" towards the end of the document. Please replicate accordingly on the website. Also re-sharing the pricing of the same

Particulars	MRP	Selling Price
The Forest Alchemy Duo	1299	999
The Heritage Trio	1299	999

13. 'Our Story' Section – Completely replace the story content as the current one doesn't showcase the true picture. The story in previous website version was proper. I am sharing below how much I re-collect the previous version. You need to build it through proper images & visualization besides the content.

Born from the Hustle. Perfected by Nature.

The Sweet Tooth & The Corporate Toll

Being founders hailing from the Gujarati and Marwari families, a deep love for food and an inherent sweet tooth are practically woven into our DNA. But as we plunged into the high-stress rhythms of modern corporate life & entrepreneurship, that love for flavor hit a wall. Trapped in endless workdays, we defaulted to quick fixes: processed snacks loaded with refined sugars. Before long, the toll caught up with us in the form of stubborn gut health issues and chronic fatigue. As lifelong foodies, we completely refused a life of joyless, cardboard-tasting dietary restrictions. We wanted an **"indulgence that cares."**

The Sumo Inspiration: Fueling True Strength

That search for balance led us to an unexpected inspiration: the ancient philosophy of the Sumo. True Sumos are masters of unyielding power, absolute mental calm, and flawless ritualistic discipline. They don't starve their bodies with restrictive, empty "zero-calorie" diets; they build their resilience through **nutrient-dense fueling** to conquer high-stress daily challenges. We realized that is exactly what the modern hustle required—not restriction, but powerful, intentional nourishment.

The Supermarket Illusion vs. Wild Reality

To find this ultimate ancestral fuel, we turned to honey. But what we found on supermarket shelves shocked us. Most commercial honey is industrially dead—heavily heated, stripped of live enzymes, and stretched with hidden sugar syrups. We realized most consumers are entirely unaware that authentic, raw wild forest honey even exists. They have never experienced the complex flavors and superior medicinal benefits of honey left completely untouched by industrial factories.

Sourcing From India's Untamed Ecosystems

We bypassed commercial supply chains and went straight into the wild. Our quest took us deep into the most remote micro-regions and pristine forests of India. Partnering with indigenous bee-foragers who have lived in harmony with these lands for generations, we harvested honey exactly as nature intended it: unprocessed, unfiltered, and alive with raw nutrients.

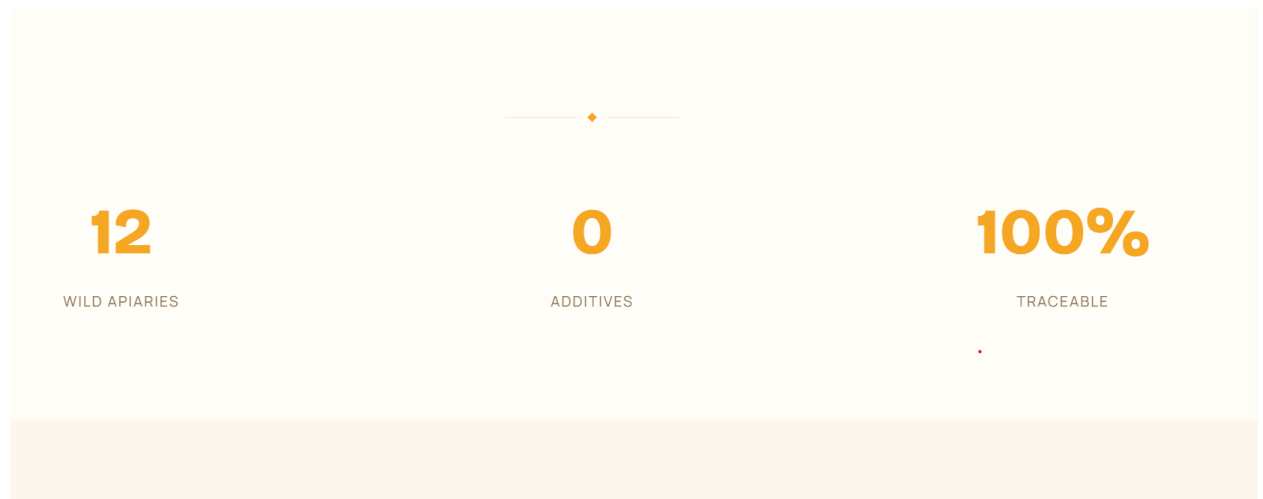

The Birth of a Daily Ritual

We brought these wild forest honeys into our own lives, turning them into a daily ritual—a mindful spoonful for morning power and a soothing reset after a chaotic boardroom day. The results were life-changing. Our gut health restored itself, our energy stabilized, and our sweet cravings were deeply satisfied without a single drop of guilt.

SUMOSTA was born to bring that exact breakthrough straight to your dining table. We did the hard work of traversing remote forests and ensuring rigorous, batch-wise lab verification so you can focus entirely on the pure joy of your daily wellness ritual.

Welcome to SUMOSTA. Welcome to Indulgence that Cares.

14. The Egyptian honey quote which you have mentioned is fine but look at the spacing, there is lot of empty space gap above & below the text which makes no sense. In mobile & laptop version it occupies so much of empty space which doesn't look good.
15. Refer the below screenshot. What sense does it make? Firstly the Details are inaccurate. Where did the '12 wild apiaries' come from? And so much of empty space around the content which makes absolutely no sense. Either remove the whole thing or show something which makes sense.

16. Replace the current photo on website with the photo shared on personal window over whatsapp.
17. Refer below screenshot

"We don't just run the company; we are our own biggest customers. We built SUMOSTA because our own sweet teeth demanded an indulgence that actually looks out for our health. Welcome to the ring!"

Please change the font of the content. Its not very pleasantly readable. Use font which is super easy to read yet unique.

18. Create new 'Evidence Hub' section on website top panel along with home, shop, our story. The evidence hub created in previous website version was just perfect. Need to recreate the same which says 'In the world of marketing claims we chose scientific facts and so on'. The NABL lab test reports of all the SKUs and the NPOP APEDA organic certification will be show cased here.
19. Under the 'Evidence Hub' section, create a page or a section for 'Research/Study reports' where we can post the following content pertaining to our individual honeys & about honey.

Rare Dammer Bee Honey (Stingless Bee Honey)

Headline: "The Low-GI Miracle: A Rare Sugar That Prevents Glucose Spikes While Fermenting in Propolis"

- **The Scientific Angle:** Stingless bee honey is biologically distinct from standard honey. It contains massive natural concentrations of **trehalulose**—a rare, low-glycemic disaccharide that is absorbed slowly without causing rapid insulin spikes. Additionally, because the bees cure this honey inside propolis (medicinal tree resin) pots instead of wax, it naturally undergoes a mild, health-boosting fermentation process that supercharges its antioxidant and anti-inflammatory properties.
- **Credibility Links:**
 - **NIH (PubMed Central):** [Stingless bee honey, a novel source of trehalulose: a biologically active disaccharide with health benefits](#)
 - **ResearchGate:** [Stingless Bee Honey: Physicochemical Properties, Biological Activities, and Therapeutic Applications](#)
 - **MDPI:** [Physicochemical Characteristics, Antioxidant Capacity, and Antimicrobial Activity of Stingless Bee Honey](#)

Canopy Dew Forest Honey (Honeydew Honey)

Headline: "The Prebiotic Powerhouse: How Honeydew Honey Nourishes Gut Microflora and Outperforms Nectar Honey"

- **The Scientific Angle:** Unlike blossom honeys, honeydew honey is incredibly rich in complex oligosaccharides (like melezitose and erlose). These non-digestible carbohydrates survive upper-intestinal digestion to act as highly effective prebiotics, feeding and multiplying beneficial gut bacteria (*Lactobacillus* and *Bifidobacterium*) while crowding out harmful pathogens. It also boasts a significantly higher mineral, protein, and amino acid profile.
- **Credibility Links:**
 - **ResearchGate:** [Effect of honey in improving the gut microbial balance and prebiotic potential](#)
 - **MDPI:** [Coniferous Honeydew Honey: Antibacterial Activity, Mineral Composition, and Nutritional Properties](#)
 - **MDPI:** [New Insights on Quality, Safety, Nutritional, and Nutraceutical Properties of Honeydew Honeys](#)

Organic Wild Forest Honey (Apis Dorsata / Giant Rock Bee Honey)

Headline: "Pure Forest Canopies: Why Wild Rock Bee Honey Has Superior Antimicrobial and Radical-Scavenging Action"

- **The Scientific Angle:** Foraged by the giant *Apis dorsata* bee from untouched, highly biodiverse forest canopies, wild forest honey is naturally rich in unique phytochemicals. Studies prove that this multifloral, wild-harvested honey exhibits exceptionally potent antimicrobial activity against common pathogens and boasts a far superior free-radical scavenging capacity compared to industrially farmed honeys.
- **Credibility Links:**
 - NIH (PubMed Central): [Antibacterial properties of wild *Apis dorsata* honey against bacterial pathogens](#)
 - NIH (PubMed Central): [Physico-chemical analysis and antimicrobial potential of wild *Apis dorsata* honey samples](#)
 - MDPI: [Antioxidant Capacity and Therapeutic Applications of Honey: A Focus on Wild Forest Varieties](#)

Dark Forest Honey (e.g., Bloodseed Honey / High-Polyphenol Honey)

Headline: "The Science of Color: Why Deep, Dark Honeys Carry the Most Powerful Antioxidant Shield"

- **The Scientific Angle:** In the scientific community, honey color is directly tied to medicinal value. Dark forest honeys derive their deep pigments from heavy concentrations of plant polyphenols, carotenoids, and flavonoids. These dark, nutrient-dense honeys contain significantly higher levels of antioxidants and trace minerals (like iron, magnesium, and zinc) compared to light-colored, mass-produced varieties.
- **Credibility Links:**
 - MDPI: [The Total Phenolic Content and Antioxidant Activity of Monofloral Honey Types: How Color Predicts Potency](#)
 - MDPI: [Honey's Antioxidant and Antimicrobial Properties: The High-Performance Role of Dark Forest Honeys](#)

Artisanal Heritage Forest Honey (Tribal Wild Honey)

Headline: "The Biosphere Effect: Why Tribal-Harvested Wild Honey Holds Unmatched Bioactive and Mineral Complexity"

- **The Scientific Angle:** Research focusing on wild-harvested tribal honeys shows they possess a highly potent, broad-spectrum antimicrobial defense system. The natural presence of organic acids (giving the honey a lower, more protective pH) combined with active hydrogen peroxide production and phytochemicals from wild forest blossoms effectively inhibits the growth of highly resilient, drug-resistant bacterial pathogens. This scientific reality validates why tribal cultures have used these specific forest honeys as highly effective traditional wound-dressings and respiratory remedies for centuries.
- **Credibility Links:**
 - NIH (PubMed Central): [Evaluation of Antibacterial and Healing Properties of Wild Forest Honey Against Pathogenic Bacteria](#)

- **MDPI:** [Antibacterial Activity of Raw, Unpasteurized Forest Honey vs. Commercially Processed Counterparts](#)
- **ResearchGate:** [Antimicrobial Potency of Wild Apis Dorsata Honey Sourced from the Mountainous Forests of India](#)

Raw, Unprocessed Honey vs. Processed Commercial Honey

Headline: "Heat vs. Healing: How Commercial Processing Kills Honey's Natural Enzymes and Bioactive Integrity"

- **The Scientific Angle:** Standard commercial honeys are ultra-filtered and pasteurized at high temperatures to prevent crystallization, which completely destroys fragile, heat-sensitive enzymes (like amylase, catalase, and glucose oxidase) and drastically lowers total phenolic content. Raw, unheated forest honey preserves these "living enzymes" and natural antioxidants, allowing them to effectively neutralize systemic oxidative stress and support metabolic health.
- **Credibility Links:**

 - **ResearchGate:** [Honey as an Antioxidant Therapy: Combating Oxidative Stress and Systemic Aging](#)
 - **NIH (PubMed Central):** [Physicochemical and Antioxidant Properties of Wild Forest Honey vs. Clinical Manuka Standards](#)

20. Refer the below screenshot section

Remove the above whole section of 'The process' – the content is not too accurate and also its taking a lot of space to just showcase fewer content.

21. I want to include the vision, mission & the sumosta philosophy appropriately & suitably on the website, either in our story section or somewhere but want to reflect the same. Please note product collection section etc is very important so on website even if philopophy mission vision is to be shown it can be after the main product collection sections and not between or before.

Vision Statement

To inspire a world where 'Indulgence that cares' becomes a way of everyday living.

Mission Statement

To create thoughtfully crafted products that transform everyday moments into simple rituals, where indulgence and wellness naturally come together.

Core Purpose

SUMOSTA aims to become a household name synonymous with trust, taste, and conscious living - transforming how India consumes sweetness, nourishment, and indulgence.

Our Philosophy

Inspired by the Sumo. Guided by Timeless Values.

Most people see a Sumo. We see a mindset.

Behind every Sumo lies a timeless mindset built on balance, discipline, patience, resilience, and inner-strength. Their power doesn't come from extremes—it comes from consistency. Every movement has purpose. Every routine builds resilience. Every ritual shapes lasting strength.

That mindset inspires SUMOSTA.

We believe wellbeing isn't created through restriction or perfection. It grows through simple choices made consistently, products crafted thoughtfully, and everyday moments that nourish both body and mind.

That's why everything we create is guided by a few enduring beliefs:

- *Wellness should be enjoyable, never a compromise.*
- *Small daily rituals create lasting wellbeing.*
- *Nature, in its most authentic form, knows best.*
- *Balance is more powerful than extremes.*
- *Every indulgence has the potential to become an act of care.*

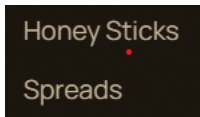

These beliefs shape every ingredient we source, every product we craft, and every experience we create.

22. Refer the below screenshot

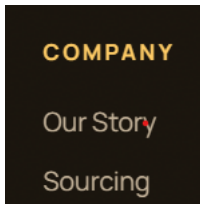

Make it 'Indulgence that cares' instead of Nature's golden promise in the bottom left section of the website.

23. Refer below screenshot

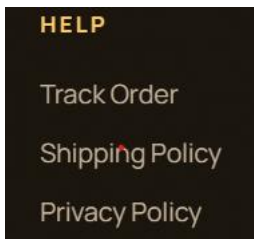

Remove these links from the bottom of the website since we are not launching the same now.

24. Refer screenshot below

Please remove the sourcing link if it takes to the same our story page even if you go to the link of Our story. Repetition. Doesn't make sense. Instead of that you might give link may be know about us and can display content around vision, mission, philosophy etc in it.

25. Refer below screenshot

Also add 'terms of service' & 'returns' policy which was shared earlier with you and was even properly shown in previous version of website. I don't understand why is it removed.

26. No need of FAQs?

27. I had shared earlier the notes on the discounts, shipping, etc however I cannot see that live on the website if I add to cart my order. Please create all these codes properly and as per terms & conditions, the same should be able to apply & use correctly.

Imp Notes:

- 10% Discounts on First order. Create Code WELCOME10.
(Please note there should be some base like mobile number or OTP on mobile after which this discount should be given. Basically there should be checks & controls in place to ensure same person is not given this discount if he orders the second time. Its Okay if they order from another mobile number & take again 10% discount as it will increase our orders only.)

- Additional 10% discount on bundling & combos. Create Coupon Code COMBO10.
*(Please note this is **not** applicable on 70g "The 5 Elements Collection" set. Other than this, the COMBO10 code will be applicable on all other bundles & combos scenarios. Place this coupon code at a suitable place while ordering to make customer feel happy)*
- Free Home delivery on orders on or above INR 499/-
- Flat INR 49 shipping charges for order value below INR 499/-
- COD handling fee of flat INR 49 will be charged on all COD Orders.
- Prepaid-only Discounts - Extra 5% off on UPI payments. Create Coupon Code PREPAID5.
(This should reflect at the time selection of payment mode so as to encourage customers to opt for prepaid instead of COD. The customer should be able to plug & play that if he selects COD then additional COD charge of Rs. 49 will be charged and if he selects prepaid order then additional 5% discount will be given.)

28. Some GOLDEN20 code is created for order value more than rs 999 on the website. Please remove the same.

29. Show FSSAI logo, Make in India Lion logo, NPOP APEDA Organic logo at the bottom of the website.

30. We need to insert some customer reviews, some blogs or videos on the website later.
