

## 'Raw Forest Honey' Product section on website

# Raw Forest Honeys

100% raw, unpasteurized forest honeys sourced from protected reserves across India.

Please change the sub-line to 'NABL lab tested, NPOP APEDA Organic certified, 100% raw forest honeys sourced from pristine Indian reserves'

### Organic Wild Forest Honey

1. Main Title: Organic Wild Forest Honey

Sub-Title captions: NPOP APEDA Certified, NABL Lab tested, 100% raw, Un-processed Honey

- Forest Sourced: Deciduous Forests
- Location: Madhya Pradesh, Uttar Pradesh & Chhattisgarh, India
- Harvested By: Tharu Tribe
- Bee Species: Apis dorsata (Giant Rock Bees)

2. 'Product Images' section (This design & sequence will be applicable for other Honey SKUs also)

- First: **The Hero Shot:** High-res product jar alongside the packaging on a rustic, natural wooden texture background ( Content of Front label face about the product SKU & its details clearly visible) – 250g & 500g jars separate images so when customer presses 250g tab in 'size / variant' section, 250g jar image appears and likewise for 500g.
- Second: **A creative Highlight video** of a '**SUMO**' explaining everything about the Honey SKU from its harvesting source, Bee species to its benefits, use-cases and organic certifications, lab tested reports. This creativity will ensure aligning our SUMO philosophy with our brand & the products.
- Third: A 10-12 seconds **Product unboxing & honey texture showcasing** video.
- Fourth: Image displaying the benefits along with product image
- Fifth: Image displaying the use-cases with creative optics
- Sixth: Image of the NPOP APEDA organic certificate
- Seventh: Image of NABL Lab tested report of the batch

3. Size / Variant: 250g Glass Jar & 500g Glass Jar – Remove 'Default' Tab

4. Instead of just 'lab tested' make it 'NABL Lab tested'. Add 'Ethically harvested'.

5. Overview & Description: Replace the current one with the following

This NPOP-APEDA Organic Certified raw forest honey is unprocessed, unheated, and minimally filtered to preserve its natural pollen, active enzymes, antioxidants, amino acids, and essential nutrients. Apis dorsata bees collect nectar from flowering trees such as Sal, Haldu, Ashid, Jamun, and Khair, along with hundreds of species of wildflowers, medicinal herbs, shrubs, vines, and

other native forest plants. Rich in natural goodness, it offers a deep woody aroma, thick texture, dark amber color, and bold authentic taste that reflects the richness of Indian forest flora.

6. Ingredients & Nutrition: **Replace the current one with the following**

100% Organic, pure, raw, un-processed honey. No additives, No preservatives, No added sugars, No artificial flavors. NABL Lab tested for purity and quality. 100% Organic certification by NPOP APEDA.

7. Product Benefits:

Please modify it to 'Rich in natural enzymes & flavonoids that aids efficient nutrient absorption & helps comfort the stomach lining thereby overall gut & digestive wellness

**Add the following:**

- Serves as a nutrient rich alternative to conventional sweeteners
- acts as an intense cellular fuel source
- Helps support quality sleep
- Helps support respiratory wellness
- Balanced carbohydrate profile of wild raw forest honey may help provide steadier energy compared to highly refined sugars which can affect mood, focus & productivity
- Acts as a natural humectant useful in skin care applications & routines

8. How to Use: **Change the current one to the following**

- **Morning wellness drink:** Mix 1 teaspoon of forest honey with warm water and fresh lemon juice. Consume first thing in the morning.
- **Breakfast Enhancer:** Drizzle over warm oatmeal, Greek yogurt, fruit bowls, or blend directly into breakfast smoothies.
- **Herbal Wellness Teas:** Pairs beautifully with Tulsi, Ginger, Chamomile, or Green tea. *Important: Allow beverages to cool slightly before stirring in honey to protect enzymes.*
- **Natural Sweetener Substitute:** Substitute refined white sugar in coffee, tea, everyday baking recipes, and homemade raw snacks.
- **Evening Wellness Routine:** Combine a small spoonful with warm milk or calming herbal bedtime infusions to promote evening relaxation.
- **Skin care routines:** DIY natural face masks of honey & turmeric, honey & aloe vera which may help support hydrated & healthy-looking skin.

9. Organic Certification & Lab Test Reports: Insert this tab below the 'How to use' tab and provide the pdf or images of the NPOP APEDA organic certificate and Lab test reports of this honey.

10. I feel product specific FAQs not required since it looks like duplication. Already the information and facts are covered appropriately in other tabs.

## **Raktbeej Forest Honey – CHANGE THIS to 'Bloodseed Forest Honey'**

11. Main Title: Bloodseed Forest Honey

Rest the sub-title and other details are proper.

12. 'Product Images' section (This design & sequence will be applicable for other Honey SKUs also)

- First: **The Hero Shot:** High-res product jar alongside the packaging on a rustic, natural wooden texture background ( Content of Front label face about the product SKU & its details clearly visible) – 250g & 500g jars separate images so when customer presses 250g tab in 'size / variant' section, 250g jar image appears and likewise for 500g.
- Second: **A creative Highlight video** of a '**SUMO**' explaining everything about the Honey SKU from its harvesting source, Bee species to its benefits, use-cases and organic certifications, lab tested reports. This creativity will ensure aligning our SUMO philosophy with our brand & the products.
- Third: A 10-12 seconds **Product unboxing & honey texture showcasing** video.
- Fourth: Image displaying the benefits along with product image
- Fifth: Image displaying the use-cases with creative optics
- Sixth: Image of Lab test report of the batch

13. Size / Variant: 250g Glass Jar & 500g Glass Jar – Remove 'Default' Tab

14. Instead of just 'lab tested' make it 'NABL Lab tested'. Add 'Ethically harvested'.

15. In overview & description – make it 'Bloodseed' instead of 'Raktbeej'. Please make this change in other sections wherever applicable.

16. Ingredients & Nutrition: Replace the current one with the following

100% raw, un-processed honey. No additives, No preservatives, No added sugars, No artificial flavors. NABL Lab tested for purity and quality. High in Iron & anti-oxidants.

17. Product Benefits:

Add the following:

- High level of anti-oxidants helps body combat daily oxidative stress
- Vital trace minerals that supports everyday cellular health
- Acts as a soothing demulcent to calm seasonal throat irritation and strengthen natural defenses

18. How to Use: Change the current one to the following

- **The Ultimate Morning Vitality:** Mix 1 teaspoon of Bloodseed honey with warm water and a squeeze of fresh lemon juice. Consuming this dark, mineral-rich honey first thing in the morning delivers a potent dose of antioxidants to kickstart your day.
- **Robust Breakfast Pairing:** Because of its deep, complex flavor profile, this honey pairs beautifully with hearty breakfasts. Drizzle it over warm steel-cut oats, ragi porridge, or Greek yogurt topped with nuts, or blend it into high-protein morning smoothies.

- **Healing Teas & Traditional Kadhas:** Its bold flavor stands up perfectly to strong, warming herbs. Stir it into Tulsi, Ginger, Ashwagandha, or classic green tea.
- **Important Preservation Rule:** Always let your freshly brewed beverages cool down to a warm, drinkable temperature before stirring in the honey. High heat destroys the live forest enzymes and delicate nutrients.
- **Post-Workout Recovery Shot:** Take a spoonful straight or mix it into your post-training hydration. The naturally occurring trace minerals and complex unrefined sugars help replenish energy stores and support muscle recovery cleanly.
- **Artisanal Sweetener for Rich Recipes:** Use it as a nutrient-dense substitute for refined sugar. It shines exceptionally well in dark coffee, robust baking recipes, homemade granola, energy bars, and traditional desserts where its rich, malty undertones add depth.
- **Deep Nourishment Bedtime Ritual:** Stir a small spoonful into warm, spiced milk (like turmeric milk) or a calming chamomile infusion to support tissue rejuvenation and relaxation before sleep.
- **High-Antioxidant Skin Rituals:** High concentration of polyphenols in this dark honey makes a superior base for DIY face rituals. Mix it with a pinch of wild turmeric or pure aloe vera gel for a deeply hydrating, antioxidant-rich mask that supports skin repair and radiance.

19. Organic Certification & Lab Test Reports: Insert this tab below the 'How to use' tab and provide the pdf or images of the NABL Lab test reports of this honey.

20. I feel product specific FAQs not required since it looks like duplication. Already the information and facts are covered appropriately in other tabs.

**Tribal Forest Honey – Change this to 'Artisanal Heritage Forest Honey'**

21. After Organic Wild forest honey and Bloodseed Forest honey, the next in sequence will be Artisanal Heritage Forest Honey instead of Stingless Bee Honey in the 'Raw Honey' section of the website.

Main Title: Artisanal Heritage Forest Honey

Rest the sub-title and other details are proper.

22. 'Product Images' section **(This design & sequence will be applicable for other Honey SKUs also)**

- First: **The Hero Shot:** High-res product jar alongside the packaging on a rustic, natural wooden texture background ( Content of Front label face about the product SKU & its details clearly visible) – 250g & 500g jars separate images so when customer presses 250g tab in 'size / variant' section, 250g jar image appears and likewise for 500g.
- Second: **A creative Highlight video** of a '**SUMO**' explaining everything about the Honey SKU from its harvesting source, Bee species to its benefits, use-cases and organic certifications, lab tested reports. This creativity will ensure aligning our SUMO philosophy with our brand & the products.
- Third: A 10-12 seconds **Product unboxing & honey texture showcasing** video.

- Fourth: Image displaying the benefits along with product image
- Fifth: Image displaying the use-cases with creative optics
- Sixth: Image of Lab test report of the batch

23. Size / Variant: 250g Glass Jar & 500g Glass Jar – Remove ‘Default’ Tab

24. Instead of just ‘lab tested’ make it ‘NABL Lab tested’. Add ‘Ethically harvested’.

25. In overview & description – make it ‘artisanal heritage’ instead of ‘tribal’.

26. Ingredients & Nutrition: **Replace the current one with the following**

100% raw, un-processed honey. No additives, No preservatives, No added sugars, No artificial flavors. NABL Lab tested for purity and quality.

27. Product Benefits:

**Add the following:**

- Pure wild-crafted biodiversity
- Its naturally occurring prebiotics help cultivate a healthy gut environment
- Acts as a natural coating to gently calm seasonal throat irritation and helps reinforce body’s everyday defense mechanism
- Wholesome, clean metabolic energy for active lifestyles without the standard sugar crash

28. How to Use: **Change the current one to the following**

- **The Ultimate Golden Immunity Shot:** Mix 1 teaspoon of Kandhamal forest honey with warm water, a squeeze of lemon, and a tiny pinch of pure turmeric (a beautiful nod to Kandhamal’s famous turmeric heritage!). Drink it every morning on an empty stomach to awaken your metabolism.
- **Everyday Kitchen Sweetener:** Easily replace refined white sugar in your daily routine. Because of its smooth, well-rounded sweetness, it blends seamlessly into your morning tea, daily coffee, freshly pressed juices, and homemade lemonade without overpowering the beverage.
- **Traditional Ayurvedic Kadhas:** Stir a spoonful into your home-brewed herbal decoctions or kadhas made with ginger, black pepper, and tulsi.  
Important Temperature Rule: To safeguard the precious live enzymes and raw nutrients, always allow your hot herbal teas or infusions to cool down to a warm, drinkable temperature before stirring in your honey.
- **Wellness Breakfast Drizzle:** Upgrade your breakfast by drizzling this rich honey over warm parathas, whole-wheat pancakes, overnight oats, or a bowl of fresh seasonal fruits and Greek yogurt.
- **Soothing Evening Wind-Down:** Add a teaspoon of this smooth honey to a warm glass of ashwagandha-infused milk or a cup of caffeine-free chamomile tea before bed to signal your body it’s time to rest and recover.

- **Heritage Skin Soother:** Use it as a gentle, purifying base for traditional DIY face masks. Mix equal parts honey and organic chickpea flour (besan) with a splash of rose water for a deeply cleansing, hydrating ritual that leaves the skin feeling soft and naturally radiant.

29. Lab Test Reports: Insert this tab below the 'How to use' tab and provide the pdf or images of the NABL Lab test reports of this honey.

30. I feel product specific FAQs not required since it looks like duplication. Already the information and facts are covered appropriately in other tabs.

**Stingless Bee Honey - Change this to 'Rare Dammer Bee Honey'**

31. Main Title: Rare Dammer Bee Honey

Sub-Title: Ultra-rare, high-end therapeutic stingless bee honey. Tangy, dark amber, harvested from the hills of Nagaland. Rich in antioxidants, enzymes, anti-microbial compounds & probiotic properties.

32. 'Product Images' section **(This design & sequence will be applicable for other Honey SKUs also)**

- First: **The Hero Shot:** High-res product jar alongside the packaging on a rustic, natural wooden texture background ( Content of Front label face about the product SKU & its details clearly visible) – 250g & 500g jars separate images so when customer presses 250g tab in 'size / variant' section, 250g jar image appears and likewise for 500g.
- Second: **A creative Highlight video** of a '**SUMO**' explaining everything about the Honey SKU from its harvesting source, Bee species to its benefits, use-cases and organic certifications, lab tested reports. This creativity will ensure aligning our SUMO philosophy with our brand & the products.
- Third: A 10-12 seconds **Product unboxing & honey texture showcasing** video.
- Fourth: Image displaying the benefits along with product image
- Fifth: Image displaying the use-cases with creative optics
- Sixth: Image of Lab test report of the batch

33. Size / Variant: 250g Glass Jar & 500g Glass Jar – Remove 'Default' Tab

34. Instead of just 'lab tested' make it 'NABL Lab tested'. Add 'Ethically harvested'.

35. In overview & description – **Change it to following**

Known locally as Melipona honey, this is the holy grail of medicinal honeys. Stingless bees (Dammer bees) are tiny, feeding on smaller medicinal flowers that larger bees cannot reach. The honey has a distinct, sour-tangy flavor due to natural fermentation inside the bee propolis cells. It has 10x the antioxidant density of standard honey and is highly priced for eye, skin, and respiratory healing. Dammer bees store their honey in pots made of propolis (bee glue) rather than wax. This leads to a slow natural fermentation that gives the honey a unique tartness and increases its organic acid profile. Also these bees are tiny and produce

very little honey. A single hive produces less than 500g of honey annually, and harvesting it from deep forest hollows is highly labor-intensive, making it a rare medicinal superfood.

36. Ingredients & Nutrition: **Replace the current one with the following**

100% raw, un-processed honey. No additives, No preservatives, No added sugars, No artificial flavors. NABL Lab tested for purity and quality. Rich in antioxidants, enzymes, anti-microbial compounds & probiotic properties.

37. Product Benefits: **Change the current one with the following:**

- High concentrations of organic propolis helps deliver a powerhouse of cellular defense and natural immunity support
- Exceptionally low glycemic index provides a steady, clean release of metabolic energy, preventing the rapid insulin spikes typically associated with standard sugars & sweeteners
- Possesses a remarkably low pH and unique organic acids which helps retain its structural integrity and provide active, long-lasting respiratory and wellness support.
- Naturally acariogenic and does not promote oral acidity or tooth decay, making it a rare wellness treat that actively respects oral microbiome.
- Helps nourish beneficial gut flora, soothe mild metabolic inflammation, and helps support optimal nutrient absorption in the digestive tract.

38. How to Use: **Change the current one to the following**

Because of its fluid, pourable texture and sharp, citrusy, tangy flavor profile, it is advisable *never* to cook with this honey or dilute it heavily. It should be treated as a targeted wellness dose or a gourmet accent.

- **The Sublingual Wellness Ritual (The Purist's Dose):** Take half a teaspoon directly under the tongue first thing in the morning. Let it dissolve slowly. Its ultra-fluid consistency allows for rapid absorption of propolis and live enzymes directly into your system.
- **The Artisanal Espresso & Matcha Cutter:** The distinct citric acidity of Dammer Bee Honey acts like a premium lemon twist, cutting through the bitterness of a double shot of dark espresso or brightening the earthy notes of ceremonial Japanese Matcha perfectly.
- **The Luxury Epicurean Glaze:** Capitalize on its tangy, balsamic-like flavor profile. Drizzle it sparingly over sharp, aged cheeses (like Parmigiano-Reggiano or Pecorino), fresh goat cheese, or over pieces of 85% dark single-origin chocolate for a sophisticated, high-antioxidant dessert pairing.
- **Propolis Spot Therapy (Elite Skincare):** Due to its incredible anti-inflammatory and non-stick moisture barrier properties, apply a single drop directly to targeted skin blemishes, dry patches, or fine lines overnight. It acts as a natural, active serum that supports cellular regeneration.
- **The Pre-Meditation Clarity Draught:** Stir a teaspoon into a cup of lukewarm (never hot) blue pea tea or pure lotus infusion before a breathwork or meditation session. The slow-releasing trehalulose keeps your brain fueled and focused without any physical restlessness or jitters.

39. Lab Test Reports: Insert this tab below the 'How to use' tab and provide the pdf or images of the NABL Lab test reports of this honey.

40. I feel product specific FAQs not required since it looks like duplication. Already the information and facts are covered appropriately in other tabs.

#### **HoneyDew Honey – Change this to 'Canopy Dew Forest Honey'**

41. Main Title: Canopy Dew Forest Honey

Sub-Title: Rare, dark, mineral-rich dew honey from the massive Sal forests of Saranda. Deep woody flavor.

42. 'Product Images' section (This design & sequence will be applicable for other Honey SKUs also)

- First: **The Hero Shot:** High-res product jar alongside the packaging on a rustic, natural wooden texture background ( Content of Front label face about the product SKU & its details clearly visible) – 250g & 500g jars separate images so when customer presses 250g tab in 'size / variant' section, 250g jar image appears and likewise for 500g.
- Second: **A creative Highlight video** of a '**SUMO**' explaining everything about the Honey SKU from its harvesting source, Bee species to its benefits, use-cases and organic certifications, lab tested reports. This creativity will ensure aligning our SUMO philosophy with our brand & the products.
- Third: A 10-12 seconds **Product unboxing & honey texture showcasing** video.
- Fourth: Image displaying the benefits along with product image
- Fifth: Image displaying the use-cases with creative optics
- Sixth: Image of Lab test report of the batch

43. Size / Variant: 250g Glass Jar & 500g Glass Jar – Remove 'Default' Tab

44. Instead of just 'lab tested' make it 'NABL Lab tested'. Add 'Ethically harvested'.

45. In overview & description – Change it to following

Unlike standard honey, Canopy dew forest honey is made by bees collecting sap secretions rather than flower nectar. Sourced from the dense Sal reserve of Saranda, Jharkhand, this honey is extremely dark, almost black. It is less acidic, crystallization-resistant, and possesses a robust woody flavor, rich with malty undertones. It features a superior profile of minerals, antioxidants, and oligosaccharides.

46. Ingredients & Nutrition: Replace the current one with the following

100% raw, un-processed honey. No additives, No preservatives, No added sugars, No artificial flavors. NABL Lab tested for purity and quality. Rich in antioxidants, minerals & oligosaccharides.

47. Product Benefits: No Changes.

48. How to Use: **Change the current one to the following**

Because Canopy Dew has a malty, earthy, resinous flavor profile that is far less "cloying" or intensely sweet than regular honey, it serves as a highly versatile culinary and wellness tool.

- **The Active Recovery Hydration Booster:** Stir a teaspoon into a glass of warm water or coconut water immediately following an intense workout, yoga session, or a long run. The rapid bio-availability of its natural tree minerals helps replenish lost electrolytes and revitalize tired muscles far cleaner than synthetic sports drinks.
- **The Connoisseur's Coffee Companion:** Traditional floral honeys often curdle or clash with the volatile acidity of coffee. However, the dark, woody, and caramel-like undertones of dew honey act as a premium natural sweetener that perfectly rounds out the bitter notes of cold brews, dark roasts, and artisan espressos.
- **The Epicurean Cheese & Grazing Accent:** Elevate your culinary pairings by drizzling this rich honey over robust, mature savory foods. It contrasts beautifully with aged white cheeses (like vintage cheddar or gouda), roasted walnuts, toasted sourdough, or sharp dark chocolate.
- **The Gentle Overnight Moisture Trap:** Use its high mineral and low-moisture profile as a highly effective topical skin treatment. Mix it with a few drops of rosewater or jojoba oil and apply it as a deeply hydrating overnight face mask to support barrier repair and leave your skin looking plump and glowing.
- **Warming Botanical Infusions:** Its earthy, complex nature stands up remarkably well to strong, spicy botanicals. Pair it with fresh ginger slices, cinnamon bark, or crushed peppercorns in warm water for a deeply grounding afternoon wellness ritual. (Wellness Guardrail: Never mix raw honey into rolling, boiling water. Let your water or tea cool down to a comfortable warm drinking temperature before stirring it in to preserve the alive forest enzymes.)

49. Lab Test Reports: Insert this tab below the 'How to use' tab and provide the pdf or images of the NABL Lab test reports of this honey.

50. I feel product specific FAQs not required since it looks like duplication. Already the information and facts are covered appropriately in other tabs.

51. Remove '5 Elements Trial Box' which is placed under 'Raw Honey' currently and move it to 'Gift boxes & Combos' section with the below title name – 'The 5 Elements Collection'.

52. Main Title: "The 5 Elements Collection"

Sub-Title: A luxury nectar flight from India's pristine forests.

Rest will be same. Just add 'ethically harvested'.

Overview & Description: **Change it to the following**

Experience the ultimate collection of all 5 SUMOSTA unique forest honeys in 70g glass jars. Features Organic Wild Forest, Bloodseed Forest, Artisanal Heritage Forest, Rare Dammer Bee and Canopy Dew Forest Honeys in a beautiful custom secondary box packaging. The

perfect way to find your favorite blend before committing to larger sizes. Also it is an excellent premium gifting option for wellness enthusiasts.

**Product Benefits:** Add the following

- ✓ Please refer to respective raw forest honey sections to learn more about individual raw honey product benefits

**Remove Product FAQs.**

53. Under 'gift boxes & Combos' remove the 'Sumosta Connoisseur Set' completely. In place of that there will be now 'The 5 Elements Collection' as per the above details.

54. The Ultimate Healing Duos – Make it '**The Forest Alchemy Duo**'.

The sub-title will be – 'The Ultimate Connoisseur's Pairing of Earth's Rarest Forest Bio-Actives'.

**Product images:**

High-Res images of 250g glass jars of Rare Dammer Bee Honey & Canopy Dew Forest Honey with a suitable high-end background.

To pull SUMO highlight video, unboxing video, product benefits images and How to use images of these 2 SKUs from their individual product section to this combo section. (250g only)

Size / Variant – make it only 250g each combo set. Remove 'default' & '500 combo set' tabs.

After Eco packaging, add – 'ethically harvested'

**Overview & Description:** Change to the following

**The Forest Alchemy Duo** brings together SUMOSTA's two most precious, structurally unique, and chemically complex wild honeys: **Rare Dammer Bee Honey** and **Canopy Dew Forest Honey**.

These are not ordinary honeys harvested from farm pastures. They are untamed, raw, and unheated elixirs sourced from pristine, deep-forest reserves across India:

- **Rare Dammer Bee Honey (The Apothecary Elixir):** Harvested from the tiny, stingless *Dammer* bees, this honey is aged in propolis-rich pots rather than wax combs. It is a rare, slightly tangy, sublingual powerhouse traditionally revered in Ayurveda as the "Mother of Medicine."
- **Canopy Dew Forest Honey (The Mineral Powerhouse):** A rare honeydew variety that never touches a flower petal. Instead, wild bees gather the nutrient-rich sap droplets of ancient forest trees. Dark, rich, and naturally malty, it is packed with earth-derived trace minerals and prebiotics.

**Instead of 'Product Benefits' tab, make it 'Why this Duo' tab and then under that, write following**

While the Dammer Bee honey serves as your ultra-potent immunity and cellular defense shield, the Canopy Dew honey acts as your daily mineral replenisher and low-glycemic, gut-nourishing

superfood. Beautifully distinct in taste, color, and texture, they represent the peak of raw forest alchemy.

Remove 'how to use' tab as it is clearly explained in individual raw honey listings.

55. Wild Forest Essentials Combo – Change this to "The Heritage Trio"

Main Title: 'The Heritage Trio'

Sub-Title: An Anthology of Untamed Indian Biospheres & Indigenous Wildcraft

Product images:

High-Res image of 3 250g glass jars of Organic Wild Forest Honey, Bloodseed Forest Honey & Artisanal Heritage Forest Honey with a suitable high-end background.

To pull SUMO highlight video, unboxing video, product benefits images and How to use images of these 3 SKUs from their individual product section to this combo section. (only 250g)

Size / Variant – make it only 250g each combo set. Remove 'default' & '500 combo set' tabs.

After Eco packaging, add – 'ethically harvested'

Overview & Description: Change to the following

**Three Sacred Forests. Three Tribal Communities. One Exquisite Legacy.**

The Heritage Trio is a sensory and therapeutic journey through India's most pristine, untouched forest reserves. This curated collection brings together three distinct, 100% raw, and NABL-tested wild forest honeys—each hand-harvested by indigenous tribal communities who have lived in harmony with these deep woodlands for generations.

Unlike farm-cultivated honeys, our giant rock bees (*Apis dorsata*) forage from ancient canopy trees, medicinal wild flora, and native blooms deep within protected wilderness zones. From the mineral-rich, iron-ore soils of Jharkhand to the misty, biodiverse hills of Odisha, this trio represents the absolute pinnacle of raw, wildcrafted purity.

Inside **The Heritage Trio**, you will discover:

- **Bloodseed Forest Honey (The Crimson Powerhouse):** Sourced from the dense, mythical canopies of the Saranda and Abujmahar forests in Chhattisgarh and Jharkhand. Naturally dark, robust, and complex, this honey carries deep-earth minerals and an extraordinary antioxidant profile.
- **Artisanal Heritage Forest Honey (The Smooth Multi-Floral Treasure):** Sourced from the pristine hills of Kandhamal, Odisha. Foraged from wild forest blooms and native herbs, it features a beautifully balanced, woody-floral flavor profile that acts as a gentle digestive and daily prebiotic.
- **Organic Wild Forest Honey (The Pristine Daily Classic):** Our baseline wild forest honey. Completely raw, unfiltered, and packed with active enzymes, it captures the clean, authentic essence of India's wild forest tracts—perfect for everyday family wellness.

**Instead of 'Product Benefits' tab, make it 'Why this Trio' tab and then under that, write following**

### **Why This Trio? (The Synergy of Terroir)**

Just as fine tea or single-origin coffee carries the unique characteristics of the soil and climate where it grew (*terroir*), wild forest honey does the same. Having **The Heritage Trio** in your wellness cabinet offers a complete, multi-functional apothecary for your home:

### **A Spectrum of Bio-Active Benefits**

By rotating between these three honeys, your body benefits from a diverse range of plant compounds:

- **Daily Immunity & Energy:** Start your mornings with the clean, enzyme-rich *Organic Wild Forest Honey* to gently awaken your metabolism and support cellular vitality.
- **Soothing & Gut Balance:** Use the smooth, multi-floral *Artisanal Heritage Honey* from Kandhamal to calm the digestive tract and nourish your microbiome with native prebiotics.
- **Deep Recovery & Vitality:** Turn to the dark, polyphenol-dense *Bloodseed Honey* to deliver essential trace minerals (like Iron and Potassium) and powerful antioxidant defense after active days or periods of stress.

### **A Palette of Wild Flavors & Textures**

This trio is a gourmand's delight. You can experience the transition from the clean, classic sweetness of the *Organic Wild*, to the gentle, herbal-woody complexity of the *Artisanal Heritage*, and finally to the bold, malty, caramelized depth of the *Bloodseed*. There is a perfect flavor profile for every tea, breakfast, or direct spoonful.

### **Directly Supporting Indigenous Livelihoods**

Every jar in this trio is an act of conscious conservation. By purchasing this collection, you directly support the sustainable livelihoods of traditional honey-hunting tribes, including the Ho, Munda, Santhal, and Kandha communities. They practice traditional, non-destructive wild crafting methods that protect the wild hives and preserve the delicate ecology of India's ancient forests.
